6 Recommended Sites to Find Products **10**

7 Updating Tool Size and Colour Lists **11**

1 Search Product Pages

1. Go to Pages → Product Pages
2. Search the item ID (excluding any size identifier)
3. If the Product Page already exists, open it and continue to Adding Items
4. If the Page does not already exist, remove the Colour identifier in the ID and search again
5. If a page exists for the item but with a different colour, continue to Cloning a Product Page
6. If no pages exist, continue to Making a New Product Page

2 Making a New Product Page

1. Select New Page → Product Page
2. Add External ID
   - Full code including colour, excluding size specifications
3. Find the Product on the Distributors Website
   - If this is not possible, find it on another website
4. Input the Product Name in the Name field
   - Format: *[Brand] [Product ID] - [Full Product Name] - [Colour]*
   - Use the distributor ID in the name
   - Make sure to get the correct colour, use the full colour name as given by the distributor
5. Copy the Name to Page Title and Meta Title
6. Input the Path
   - starts with '/' followed by the Product Name in lowercase, use '-' in place of special characters and spaces
7. Add Parent Pages
   - Brand
   - Item Category
   - Others if necessary
8. Save
9. Screenshot the Product Image on Distributors Website
   - win+shift+s to open snipping tool
   - drag a box to select the image area
     - include only the product, no extra content such as website logos
   - click the windows popup to open the image
   - save image as product code
10. Add the Image to Images
    - Select Add
    - Select your screenshot
11. Highlight and copy the product description on Distributors Website
    - Paste it into Description - Long Description
    - Remove headers and titles
    - Remove unwanted content (eg Country of Origin)
12. Continue to Adding Items

3 Cloning a Product Page for a New Product Colour

1. Open the Product Page for an Existing Colour of the same Product
2. Right Click “Clone Page” and select “Open Link in New Tab”
3. Edit the Colour Code in External ID for the New Product Colour
4. Find the Product on the Distributors Website
    - If this is not possible, find it on another website
5. Change the Colour in Name, Page Title, Meta Title
    - Make sure to get the correct colour, use the full colour name
6. Copy Path in the original page
    - Paste it into Path on the new page
    - Edit the colour at the end
7. Save
8. Screenshot the Product Image on Distributors Website
    - win+shift+s to open snipping tool
    - drag a box to select the image area
        - include only the product, no extra content such as website logos
    - click the windows popup to open the image
    - save image as product code
9. Add the Image to Images
    - Select Add
    - Select your screenshot
10. Change the colour in Description if required
11. Continue to Adding Items

4 Adding Items

1. On Page, copy External ID
2. Go to Items
3. Paste ID into Add a New Item
    - This will show all items matching the ID
    - Select one, press Enter
    - Repeat this process until no more items appear
4. Add Tags to Items
    - If there are 4 or more items, see Using the Tag Tool
    - If there are 1 or 2 items, you can instead see Adding Tags Manually
5. Inspect each item [1]
    - Uncheck "Allow purchase if stock not available"
    - Confirm that Tags were added correctly
6. Order the items according to the Item Order Standards
7. Save

[1] This can be skipped if checkbox updated and everything seems to be working consistently

4.1 Adding Tags Manually

1. Open each item in a new tab
    - For multiple items, use copy+paste to speed up the process and maintain consistency
    - You can quickly move through browser tabs using "ctrl+tab"
2. Uncheck "Allow purchase if stock not available"
3. Go to Tags
4. Enter Brand
5. Save
6. Enter Colour
    - Match product colour to closest standardized colour
        - Look at the product image
    - Enter the standardized colour
    - DO NOT enter the product actual colour
        - eg Red Duck Heather should be entered as Brown
    - If multiple colours required, press enter and add a second colour
7. Save
8. Add Workwear Categories or Footwear Type
    - Footwear gets a Footwear Type
    - Everything else gets Workwear Categories
        - Can be multiple if required (press enter between categories)
    - Watch punctuation and spacing carefully
9. Save
10. Enter Size
    - Match to item code (after the last '-')
11. Save
12. Enter Features
    - Look at item description and similar items for features
    - Items should have up to 5 features, usually 2 or 3
    - Make sure to separate features by pressing enter (all other characters such as commas and spaces will consider it to be the same feature)
13. Save
14. Close all items

4.2 Adding Tags using the Tool

1. Open the Tag Tool
2. Copy the External ID into the Product ID field
3. Enter the Brand
4. Select a colour from the dropdown
5. Confirm the item type (Clothing, shoes, or pants)
6. Enter the Workwear Category or Footwear Type
   - See Footwear Type and Workwear Categories for standardized list
   - If multiple Workwear categories are required, separate them with a | symbol.
7. Enter Features
   - Look at item description and similar items for features
   - Items should have up to 5 features, usually 2 or 3
   - Type in features individually, use the add/remove button for each one
   - A feature can be removed by retyping it exactly (including spaces and capitalization) and clicking the add/remove button
8. Add all sizes
   - Select a size from the list
   - Click add/remove size
   - Selecting the same size and clicking add/remove will remove it
   - For pants, select from both boxes as appropriate
9. When everything is correct, click Submit
10. Find the excel file in the /outputs folder
    - It will start with the Product ID, followed by the date and time of creation
11. On Nomad, click Site Setup and select Import/Export
12. Select Tags
13. Select Choose File
14. Select your newly created file and click open
    - Sort by Date Modified to make finding it easier
15. Click Save
16. The Tags will be updated after about a minute
    - You can refresh the page until the status for that file says “completed”
    - Or just move on to the next task

5 Standards

5.1 Item Ordering

When ordering items, use the following methods depending on how the items are sized:

Normal (XS, S, ...)	**Boots (5, 5.5, ...)**	**Pants (30/30, 32/30, 32/32, ...)**
• XS → 0	• 5 → 50	• 30/30 → 3030
• S → 10	• 5.5 → 55	• 32/30 → 3230
• M → 20	• ...	• 32/32 → 3232
• ...	• 10 → 100	
• 4XL → 70	• 10.5 → 105	
	• 11 → 110	

Maintaining the standard allows items to be added at a later date and maintain the correct order without changing the ordering values of the already existing items. Values are incremented by 10's in case there is a unusual size for an item and it needs to fit in between 2 normally sized items.

5.2 Colours

We use only basic and simple colours in Tags so that they can be easily organized and searched for. A complete and up-to-date list is maintained with the tool, but the following list should be generally sufficient:

- Black
- Brown
- Red
- Orange
- White
- Tan
- Green
- Pink
- Grey
- Blue
- Yellow
- Purple

5.3 Workwear Categories

- Pants
- Shirts - T-Shirts
- Jackets & Coats
- Sweatshirts
- High Vis
- Overalls
- Rainwear
- Gloves
- Shirts - Button-Up
- Flame Resistant
- Socks
- Coveralls
- Vests
- Chef Coats
- Shorts
- Base Layers
- Boot Accessories
- Caps
- Toques
- Boxer Briefs
- Scrubs
- Safety Glasses
- Aprons
- Belts
- Baselayers
- Balaclavas
- Kneepads
- Wallets
- Hats
- Bags
- Long Sleeve
- Laces
- Hard Hats
- Pant Accessories
- Accessories
- Neck Gaiters
- Suspenders
- Drinkware
- Kid's Clothing
- Hoods
- Belt Accessories

5.4 Footwear Types

- 6" Boots
- 8" Boots
- 10" Boots
- Leather Slip-On Safety Boots
- Service Industry/Kitchen Shoes
- Athletic Safety Shoes
- Rubber Boots
- Winter Boots
- Oxford Casual Safety Shoes
